

Postdoc in Multiorgan involvement in Inflammatory Skin Diseases – DREAM Centre Aarhus

The Institute of Clinical Medicine Department of Dermatology at Faculty of Health at Aarhus University invites applications for a position as Postdoc in the field of Inflammatory Skin Diseases with multiorgan involvement as per October 1st 2025 or as soon as possible thereafter. The position is a fixed-term full-time position for 3 years.

The project will be part of the new DREAM (Dermatology Research Across Multiple Disciplines) Center financed by the LEO Foundation. You will be part of building this new center which bridges Aarhus University, Faculty of Health and Faculty of Natural Sciences, and Aarhus University Hospital. The overall project will leverage an existing clinical cohort, as well as develop the framework for a new cohort of patients with multiorgan autoinflammatory diseases (MAID).

The Department of Dermatology has a long tradition for translational research. We currently have 2 professors, a clinical chair professor and a professor in molecular dermatology. We have a living and diverse research environment with 2 postdoctoral fellows, 9 PhD students, 5-6 research year students and 4-7 master's students. We are located next to the department of dermatology's outpatient clinic and take advantage of this in order to carry out patient-proximal research.

Our research partners involve Rheumatology, Hematology, Public Health, Environmental Medicine, General Practice both nationally and internationally

About the research project

The research project will examine long term clinical outcomes of a multidisciplinary treatment protocol in a group of multiorgan involved autoinflammatory skin disease patients. You will examine clinical parameters, biomarkers for treatment response and efficacy. Furthermore, this work will also lay the foundation for a cohort of multi organ autoimmune disease patient within Central Region Denmark for future studies of risk factors, biomarkers, treatment response and more. The project will be part of laying the foundations for the DREAM, and you will interact with and synergize with several other groups including two postdocs and multiple students anchored at the Departments of Biomedicine and Molecular Biology and Genetics at Aarhus University.

Your job responsibilities

As Postdoc in DREAM at the institute of clinical medicine, Department of Dermatology, your position is primarily research-based but may also involve teaching assignments. You will contribute to the development of the DREAM Center through research of high international quality, but also through pioneering work of inter-department and inter-institutional collaboration establish a center for systems medicine.

This position is one of three postdoctoral positions based in the DREAM Center at Aarhus University, a LEO Foundation funded clinical interdisciplinary research center bridging Aarhus University and Aarhus University Hospital and spanning the departments of Clinical Medicine, Biomedicine, and Molecular Biology & Genetics at AU, and the departments of Dermatology, Rheumatology, Gastroenterology, AUH. You will synergize with the other two postdoctoral fellows in the interdisciplinary framework of the DREAM Center, which additionally hosts a number of MSc, PhD and Research Year students at the involved partner departments. You will participate in biweekly DREAM meetings, a regular journal club, and an annual DREAM symposium.

Your main tasks will consist of:

- Independent research of high international quality, including publication.
- You will contribute to the development of a new cross-institutional research center
- You will take part in supervision of master's students and research year students
- You will part take in center meetings and evaluation meetings of DREAM
- Developing DREAM into a Internationally recognized Research Center

You will report to the to the Professor Claus Johansen, who will be primary investigator.

Your competences

You have academic qualifications at PhD level, within the following areas Dermatology and inflammatory diseases, use of registry data, and clinical dermatology. clinical
