

Student assistants wanted: Generative AI in education

Do you want to explore how generative AI is reshaping education—both in theory and practice? We're looking for curious and motivated student assistants to join our projects at Department of Management.

The Department of Management is looking for a student assistant from 15 July 2026, until 30 June 2027 to assist with administrative and practical tasks.

What you'll be working on

Please note that you do not need to be able to do all of the following, but preferably at least some of them.

- Help develop and test new GenAI-based teaching materials, activities, and course-specific tools that teachers can use in their courses, including API-based tools, voice-based activities, RAG setups and simple simulations produced with tools such as Codex or Claude Code.
- Test the quality of existing GenAI teaching tools.
- Use qualitative and / or quantitative methods to investigate how students tend to use GenAI.

What we imagine you bring

- Interest in generative AI, education, and how people actually *use* these tools.
- Experience with at least some of the following: using various GenAI tools to actively facilitate your learning and work, API calls, programming experience (basic Python, JavaScript, HTML or similar). You don't need to be an expert already, just willing to learn and help out.

What you can expect from us

- Close guidance and supervision - we don't expect you to know it all from day one
- Flexible working hours and contract length (we'll make this fit in with your studies)
- The chance to work on cutting-edge GenAI projects in higher education
- Potential to connect the work with your own master's thesis later on

About the department

The Department of Management is part of Aarhus BSS, Aarhus University – a top 100 university. Aarhus BSS has achieved the triple-crown AACSB, AMBA and EQUIS accreditations.

The department has an international research and teaching environment, employs approximately 160 Danish and international researchers, academic staff, and PhD students. We excel in business management, including strategy, innovation, marketing, organisation, digitalisation, and accounting. Our aim is to deliver high-quality research, with a strong emphasis on publishing in leading academic journals and presenting at recognised conferences.
